Angular Developer

Development Projects

Defense Academic Submission Management Portal

- Developed a full-stack submission portal using Angular, Node.js, MSSQL, PrimeNG, JWT, Cloudinary.
- Integrated Cloudinary for file storage and used PrimeNG for responsive UI development.
- Implemented JWT-based authentication and role-based authorization.
- Built thesis and project submission workflows for students and supervisors.
- Developed approval/rejection functionality for supervisor reviews.
- Created a complete user management system with role assignments.

2025-26 AI Chatbot (Google Gemini API)

- Developed an AI-powered chatbot using Google Gemini API and Node.js.
- Integrated natural language processing capabilities to generate intelligent user responses.
- Built RESTful APIs with Express.js for chatbot communication and request handling.
- Implemented prompt management and response processing for seamless conversational interactions.

2025-26 Library Management System

- Developed a full-stack library management system using Angular, Node.js, and MSSQL.
- Implemented JWT-based authentication and role-based access control.
- Built book management features including add, update, delete, and search operations.
- Developed book borrowing and return workflows with availability tracking.
- Created member and librarian management modules with CRUD functionality.
- Designed a responsive user interface using PrimeNG and integrated REST APIs for data management.

2025-26 Restaurant Table Management System

- Developed a full-stack system for table reservations, order processing, and billing.
- Built responsive frontend interfaces with Angular and RESTful APIs using Node.js.
- Managed restaurant data, orders, and customer reservations using SQL Server.

2025-26 Tailor Management System

- Developed a full-stack tailor system for customer measurement tracking and order management.
- Implemented customer, order, and measurement management modules using Angular and Node.js.
- Utilized Prisma ORM with SQL Server for efficient database operations and data management.
- Built a responsive user interface and integrated RESTful APIs for seamless workflow management.

2025-26 CalcPlus Android App

- Developed an Android application featuring calculator and productivity tools using Java and Android Studio.
- Implemented a user-friendly interface with efficient calculation and utility functionalities.
- Designed and optimized the application for smooth performance on Android devices.

Skills & Abilities

AI tools **ChatGPT, Claude, Cursor AI, Antigravity;**

Programming Languages Comfortable: **C, C++**; Familiar: Python, Java

Web Tech **Angular, primeNg, JavaScript, html, css**

Databases **MS SQL Server, MySql**

Source **github**
Control

Programming Contest

Gono IUPC **Intra University Programming Contest, GBPC**, Ranked: 1st

Education

2022 – **Gono Bishwabidyalay**, *B.Sc Hon's in Computer Science And Engineering*, Nolam, Savar,
Present Dhaka

2018-2021 **Kaliakair Degree College**, *Higher Secondary certificate*, Kaliakair Degree College, Kaliakair
Gazipur

2018 **Ashraf Ali High School**, *Secondary School certificate*, Shabazpur, Kaliakair
Gazipur

Hobbies

- Traveling
- Football
- Cricket
- Video Games
